

National Online Safety

In our continued efforts to safeguard children against online dangers and teach them about how to act safely when using the internet, Manor Park are now working closely with National Online Safety. We hope that all staff, governors and parents will work in partnership to take an active role in keeping up to date with the rapidly developing platforms, APPs, social media channels and games, which children may be using. We also hope to empower parents with the knowledge to protect their children from the dangers of the internet. NOS has interactive online workshops to help parents and offers resources, including platform guides.

Parents can register with NOS, through Manor Park's own account, allowing access to all the fantastic information and resources available. As the online world is posing an ever-increasing risk to children, please take the time to register and access the online workshop and resources for parents.

Thank you for your support.

Mrs Jacoby, Assistant Headteacher/Safeguarding Lead
